

# CO1-ASSESSMENT TOOL-AT-3

## INTERNET PROGRAMMING CSA4302

NAME: B. Pavan Kumar Reddy

REG NO: 192311382

### 1. Scenario: Web Development Standards Implementation:

A start up is developing a modern web application. During development, the team encounters multiple issues related to HTML elements, HTTP methods, XML syntax, and web communication protocols. The following observations are made:

- The team needs to embed a promotional video on the homepage.
- A registration form must securely send user data to the server.
- The navigation menu must follow semantic HTML standards.
- XML configuration files are being used but contain syntax errors.
- The application must communicate over the correct web protocol.

### Data Snippets Provided Snippet 1: Video Embedding

- A. `<media src="video.mp4"></media>`
- B. `<video src="video.mp4" controls></video>`
- C. `<movie src="video.mp4"></movie>`
- D. `<vid src="video.mp4"></vid>`

**Correct Answer: B. `<video src="video.mp4" controls></video>`**

### Explanation

The `<video>` tag is the correct HTML5 element for displaying videos. The `controls` attribute allows users to play, pause, and adjust the volume.

### Snippet 2: Form Submission Methods

- A. GET
- B. POST
- C. PUT
- D. DELETE

#### Correct Answer: B. POST Explanation

The POST method sends data securely in the request body instead of the URL. It is the best choice for registration forms.

### Snippet 3: Navigation Elements

- A. <div>
- B. <nav>
- C. <section>
- D. <header>

#### Correct Answer: B. <nav> Explanation

The <nav> tag is used to define the navigation menu of a webpage. It improves webpage structure and accessibility.

### Snippet 4: XML Syntax A.<note><to>User</to><from>Admin</from>

- B.<note><to>User</to><from>Admin</from></note>
- C. <note><to>User</from></note>
- D. <note to="User"></note>

#### Correct Answer: B. <note><to>User</to><from>Admin</from></note>

#### Explanation

This XML is correct because all tags are properly opened and closed. The other options contain missing or incorrect closing tags.

### **Snippet 5: Web Communication Protocols**

- A. FTP
- B. HTTP
- C. SMTP
- D. SNMP

#### **Correct Answer: B. HTTP Explanation**

HTTP is the standard protocol used for communication between a web browser and a web server. It allows web pages to be requested and displayed correctly.
